THE CROCODILIANS' JOURNEY STARTED
260 MILLION YEARS AGO...

رحلة المائتي مليون عام...

Crocodiles lived alongside dinosaurs for millions of years. In this scene, dating from 66 to 66 million years ago, we can see a meeting between a young *Tyrannosaurus rex* and a *Deinosuchus*, one of the largest crocodilians that ever existed (12m long and weighing 11 tonnes). A violent clash between the two might very well have been possible. The adult *Tyrannosaurus* was also one of the most formidable predators of all time.

65 MILLION YEARS AGO, THE CROCODILIANS SURVIVED THE GREAT EXTINCTION THAT DEFEATED DINOSAURS

business, however, is not the only means of raising the money needed to finance important financial projects. In fact, investment banks have developed many other ways to raise money for their clients. They can, for example, help a company issue bonds or preferred stock, or they can help a company raise money by selling its assets.
